Peace of mind!

Intelligent solutions for your comfort.

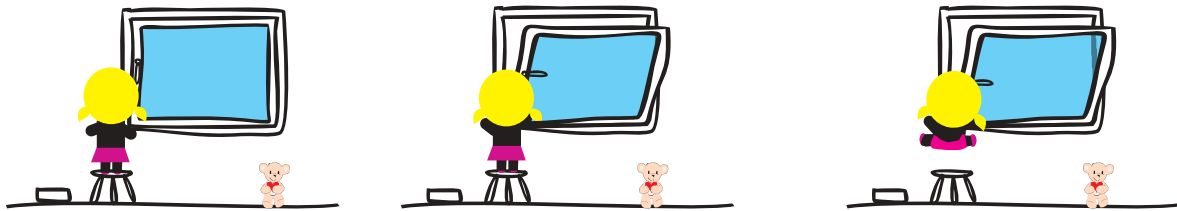

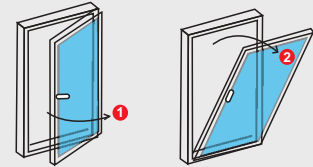

“ More security for your child! ”

Estimated 4000 children under the age of 15 are injured by falling out of windows each year. To help reduce the amount of incidents involving people, especially children, falling out of windows we have introduced an innovative product TGP Tilt First system.

Tilt & Turn System

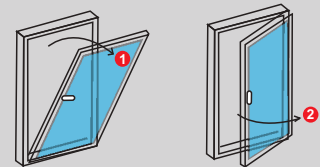

1. Turn position; completely open.
2. Tilt position.

This system is ideal for children rooms, kindergartens, hotels, student accommodation . It also provides an added benefit of extra security, thanks to tilt from bottom and lockable window handle.

Tilt First (Tilt Before Turn) System

1. Tilt Position; Ventilation position, restricted to the outdoors (if you have lockable handle with profile cylinder, it is blocked)
2. Turn position (if you have lockable handle, only with key you can come to turn position)

If you prefer to use TGP *fora* lockable handle with profile cylinder, T-40001-40-0-7 this way window can not be opened completely. It will prevent the possibility of changing from tilting to turning. The window handle can only come to turning position with the handle key.
