Glass Channel Systems

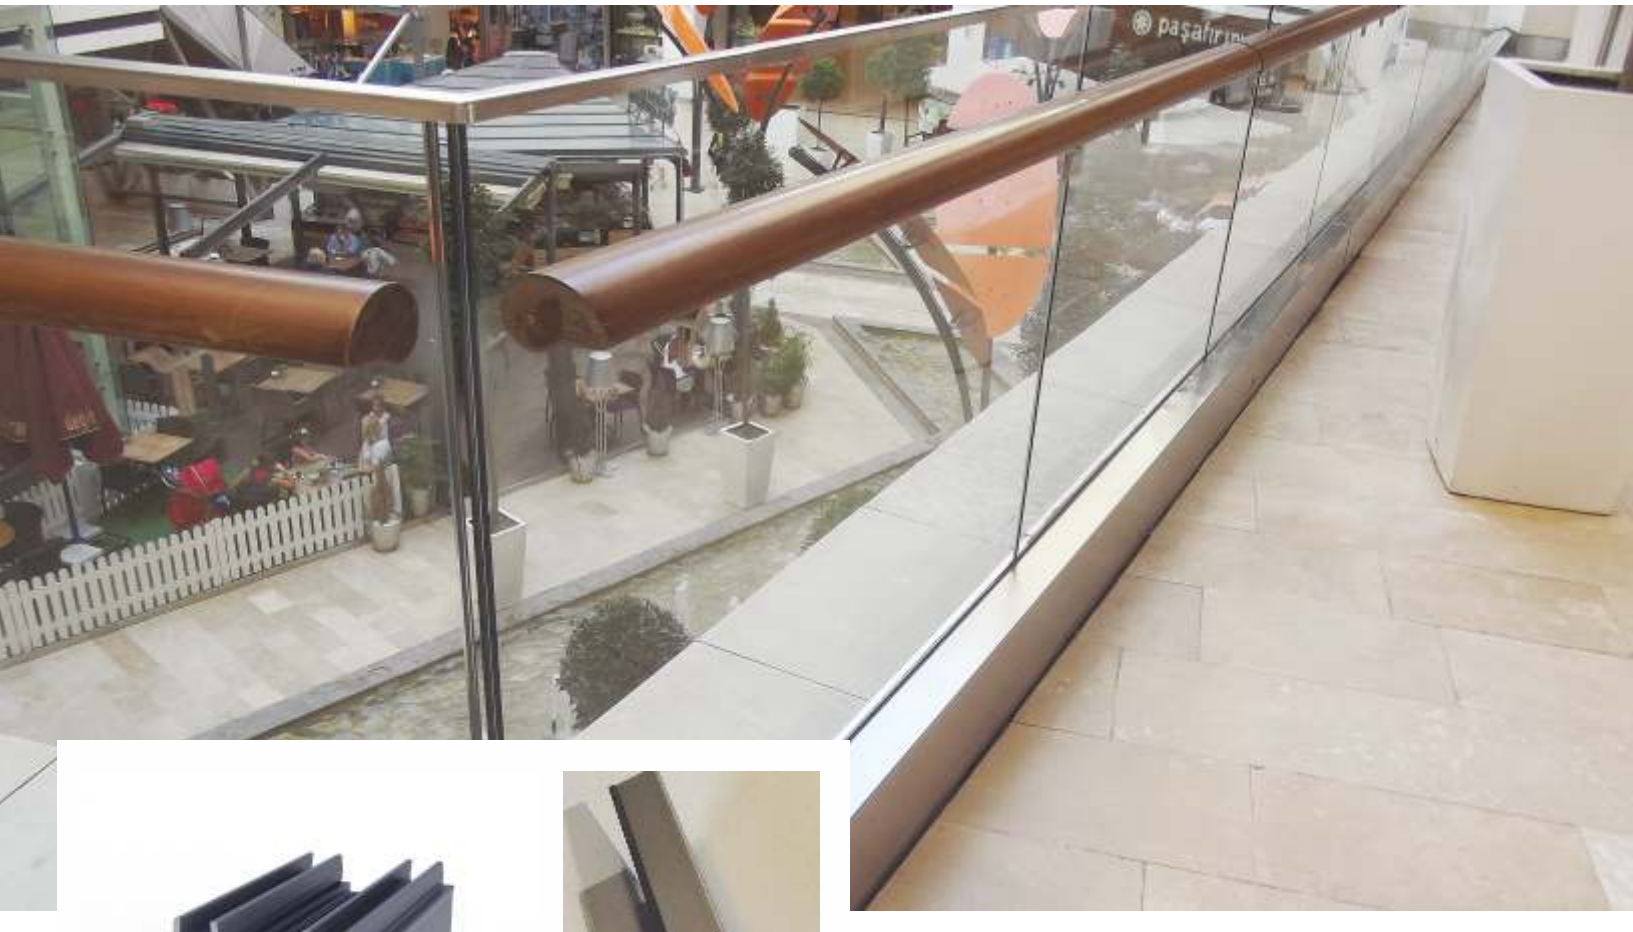
www.tgpsystems.com

TGP Railing Systems are available in 3 types; railing combined with glass, railing with horizontal elements and finally railing with cylindrical profiles. Now , we have a new design of glass support system (TGS) which are preferable by architects especially for swimming pools, balconies and stairs with high architectural requirements.

TGP Glass Channel Systems (TGS) offers 2 different basic types ; on-floor and in-floor. It can be placed on the final floor or on a parapet with glass of 10 to 20 mm thickness.

Thanks to different dimension of bases (15cm, 20cm and 30 cm) , system will have maximum stability with 120 cm glass height and glass of 20 mm thickness.

TGS offer the feeling of freedom thanks to only glass non-barrier railing system.



Type **A**

Type A

- On Floor glass supporting system
- Glass of 20 mm thickness is available.
- Adjustment of the glass positioning
- Easy to assemble

Code	Dimension	Weight	Description
GC-A0-15-0	86X110	1,66 kg/pcs	max.20 mm glass
GC-A0-20-0	86X110	2,40 kg/pcs	max.20 mm glass
GC-A0-30-0	86X110	3,32 kg/pcs	max.20 mm glass

Type **B**

Code	Dimension	Weight	Description
GC-B0-15-0	86X110	1,30 kg/pcs	max.16 mm glass
GC-B0-20-0	86X110	1,85 kg/pcs	max.16 mm glass
GC-B0-30-0	86X110	2,58 kg/pcs	max.16 mm glass

Type B

- In Floor glass supporting system
- Glass of 16 mm thickness is available.
- Adjustment of the glass positioning
- Easy to assemble
