Security

A burglar's preferred mode of entry is through a door or a window. A burglar prefers to spend a maximum of 60 seconds on breaking and entering. Any measure that can increase this time is a major deterrent.

TGP Systems offers a wide range of home security measures

- **Mushroom locks with striker**
- **Lockable security handle**
- **Anti-theft corners, middle locks and gears**

“

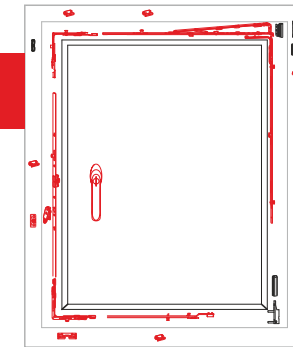

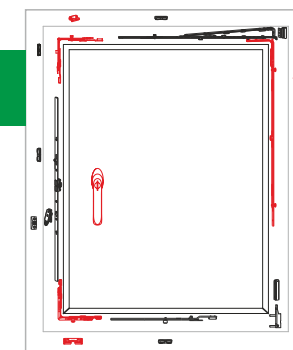

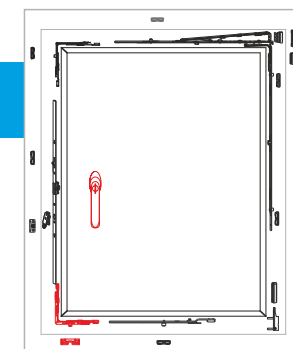

TGP Systems offers  
3 anti-theft window  
options

## 2<sup>nd</sup> RESISTANCE CLASS

## 1<sup>st</sup> RESISTANCE CLASS

## BASIC SECURITY

### BASIC SECURITY

Burglars start by prying open the window frame at handle level. TGP basic security package offers corner transmission with mushroom pin at the bottom and lockable handle.

### WK1

Wk1 conforms to DIN 1627 European norms regarding anti-theft window persistence class. This package is highly resistant to kicks, jumps and shoulders

### WK2

WK1 conforms to DIN 1627 European norms regarding anti-theft window persistence class. This package is highly resistant to tools, screwdrivers, pliers, etc. On top of WK1, it has additional security on top and bottom. This translates into a strengthened sash and frame joints.
